

Here is the clue for **your safety** in Elevator!

Rope Stopper

Elevator overspeeding in the up direction? Elevator leaving the floor with the doors opened? For the firm answer to these questions, you'd better put a stop to it with the **"ROPE STOPPER"**.

Mechanical or electrical failures are rare, however, should they occur an elevator may overspeed in the up direction or leave a floor with the doors opened. Soon to be required in the U.S. code and now required in many countries, an elevator must stop when these failures occur. We have a "STOP" on the situation and are eager to serve with **"ROPE STOPPER"**.

The **"ROPE STOPPER"** is very easy to install, to be adjusted to the any degrees of rope movement directions.

Rope Brake (KE200C)
